

ECO-ROLL

The BIO mulch roller ECO-ROLL is the alternative to mulching. The roller can be entrained without any problems during any operation. The ECO-ROLL compresses the vegetation, whereupon the spades mounted on the roller kink the stalks and thus fold them over. The result is a mulch carpet that promotes good shadow fermentation. The plants sprout again at the vegetation point and provide the next organic carpet. With legumes, this method stimulates the growth of the nodule bacteria (rhizobia) and increases the nitrogen-collecting effect.

Model	Weight with frame	Working width	External size
ECO-ROLL 400	ABOUT 125 KG	400 MM	470 MM
ECO-ROLL 500	about 145 kg	500 mm	570 mm
ECO-ROLL 600	about 170 kg	600 mm	670 mm
ECO-ROLL 800	about 235 kg	800 mm	885 mm
ECO-ROLL 1000	about 310 kg	1000 mm	1085 mm
ECO-ROLL 1200	about 355 kg	1200 mm	1285 mm

Model	Weight with frame	Working width	External size
ECO-ROLL 1300	about 375 kg	1300 mm	1385 mm
ECO-ROLL 1400	about 400 kg	1400 mm	1485 mm
ECO-ROLL 1500	about 420 kg	1500 mm	1585 mm
ECO-ROLL 1600	about 445 kg	1600 mm	1600 mm
ECO-ROLL 1800	about 535 kg	1800 mm	1895 mm
ECO-ROLL 2000	about 580 kg	2000 mm	2095 mm
Version with hydraulic adjustment	about 625 kg	1100 - 1950 mm	1200 - 2060 mm
