

ELECTRIC ROUND SHEET FILTER STAINLESS STEEL

ENOL plate filter (round filter) R22 VA/VA made of stainless steel, with centrifugal pump. The round ENOL R22 stainless steel filter is ideal for filtering alcohol, liqueurs, but of course also wine and other food liquids. Electropolished stainless steel filter plates are versatile and easy to clean. The filter can be removed in seconds using four mounting nuts. It is designed for filtration with 2 filter layers with a diameter of 22 cm. Sealing is done using O-rings, which guarantees no leakage. The high-quality SPECK centrifugal pump is mounted on a stainless steel base. - In the case of VA/VA, the pump body and impeller are made of stainless steel. A ball valve for regulation and a pressure gauge are included in the set.

Weight: 17 kg.
