

HALBAUTOMATISCHER FLASCHENSPÜLER MIT UMWÄLZPUMPE

Bruttopreis:
27 273 €

Nettopreis:
22 173 €

The rotary rinsing machine mod. TP10/R is designed to rinse new bottles, to clean the inside from powder and any small particle, prior to the filling operation, with a recycling system for using a sanitizing or an alcohol based solution. In the wine industry, it can be used with a solution of water and SO₂. Output up to 700 bph
