

MASCHING CONTAINER 1000 LITERS WITH COVER

Bruttopreis:
4 496 €

Nettopreis:
3 655 €

The Speidel mashing container is the tried and trusted dipping-edge technology in a new design. It is made of food-safe and UV-resistant PE material (natural colour without pigments) and is particularly thick-walled for maximum stability and preserving the mash aroma. Thus the container is ideal for storing fruit must and corn mash.

Continuous operating temperature max. 60

FOOD SAFE

ROBUSTAs is usual with Speidel, these containers are particularly thick-walled and therefore extremely robust.

CLEANING

The smooth inner surface ensures that the container is very easy to clean.

OUTLET

The outlet is at the lowest point of the container. Thus, complete emptying is possible. Outlet with stainless steel bushing 1 1/4" IG. The price of the tank includes a stainless steel ball valve - 1 1/4".

BASE

The PE base is not only stable, it makes it easy for forklifts and pallet trucks to get under the container.

DIPPING EDGE

The dipping edge acts as a circular airlock. When filled with liquid, the fermenting mixture inside is protected from bacteria.

Advantages

- Food safe PE material

- Stackable in empty condition
- Easy to clean due to smooth inner surface
- PE slip-on lid
- Dipping edge
- Completely emptyable due to bottom outlet bead
- Accessable base for forklifts and pallet trucks

Dimensions

- Height: 132 cm
- Diameter: 133 cm
