

MICROBREWERY 2,5 HL, EASYBRAU VELO

A 2,5 hl microbrewery is an ideal solution for restaurants and agritourism farms that want to offer their own beers to their customers. The device can also be used in testing new recipes or training brewing students.

The presented microbrewery is a single-block structure made of AISI 304/316 stainless steel with all parts already connected, the Pocket-Bräu brewhouse is ready for operation after connecting to electric, water and gas cables.

Suitable for producing any type of beer. The Pocket-Bräu microbrewery requires little space, short installation time, is user-friendly and easy to use.
