

MID-MOUNTING FRAME

The execution of multiple operations in one pass saves time and money. Oftentimes though, the length will be unhandy or impractical, if working machines are mounted in the front and rear. Our side-mounting frame offers an efficient and compact solution, as it serves as an adapter for our series of undervine care equipment. The basic frame with the column lifters is fixed and can be equipped with the currently required implement. The frame can be attached to different tractors using the respective mounting brackets.
