

MULCHER, ROTARY ORCHARD MOWER WITH ADDITIONAL EQUIPMENT

The variable mulcher for wine and fruit growing works excellently in vegetation management and is also suitable for shredding vine cuttings. It is driven by a 540 rpm PTO and a factory supplied cardan shaft with slip clutch. A double-acting control unit is required for hydraulic width adjustment. The two rotating blade carriers, each equipped with two freely movable blades, guarantee a high mulching speed with low power requirement. The cutting height is adjusted at the front by large adjustable support wheels and at the rear by a continuously adjustable roller. This guarantees the best running characteristics, even on uneven terrain. Maintenance-friendly due to few lubrication and oiling points and low-wear blades.
