

PNEUMATISCHE TRAUBENPRESSE, SMART, WOTTLE

Pneumatic grape press from a renowned Austrian manufacturer.

The new intelligent wine press is fundamentally revolutionizing grape processing and is the perfect combination of renowned Wottle quality and state-of-the-art technology.

The intelligent wine press impresses with intuitive control via a 10-inch TFT multi-touch display, Internet connection (cloud connectivity and remote maintenance). Ability to send notifications to the press operator's phone. A specially developed program enables precise filling and accurate positioning of the basket. Combined with advanced sensors such as temperature and pH measurement, you can effortlessly achieve continuous real-time monitoring and correction of the grape pressing process.

A quick cleaning system using a mixture of compressed air and water makes it easier to clean the press, saving resources and time.

Internet connectivity

- Cloud connectivity/remote maintenance
- Import/Export of stamping programs
- Notifications on your mobile phone: error messages, duration, pressing status
- 10" TFT touch display, IP68 protection level
- Easy and modern user interface

Additional features

- Several engine speeds
- Precise filling program
- Accurate basket positioning
- Antioxidant program
- Quick cleaning system with a mixture of compressed air and water
- Sensors: temperature, pH value
