

STEAM GENERATOR

This steam generator is extremely fast with a continuous supply of steam

- fully operational in 60 seconds
- always ready to steam
- continuous steam supply as long as needed
- water level monitoring to prevent water shortage and dry run
- simple to descale

This turbo steamer finds its optimal application in small to medium-sized wineries. It is used to the sterilization of sheet filters, candle filters and filling machines, to help clean and sterilize barrels, wooden fermenters and tanks - , or to remove wine stone.

Specifications:

Electrical power rating: 9.9 kW

Electrical connection: 3 phase / N / PE 400 V AC 50 Hz

Electrical connector: male CEE 5 pole 16 A

Mains cable: approx. 5 m

Fusing: 16 A

Water connection: GeKa coupling

Steam output connection: NW 25

Minimum water pressure: 2.5 bar

Maximum steam pressure: 2.5 bar

Amounts of steam: 15 kg per hour

Weight: approx. 50 kg

Length x width x height: 760 mm x 345 mm x 690 mm
